

Call for Proposals

Holmusk is inviting applications for the **NeuroBlu™ Award** – an opportunity worth € 50,000, that gives you free access to the world’s largest real-world dataset in mental health – and the analytics power to interrogate it.

- Are you a start-up developing products in mental health? Do you need real world data to understand how your product might work in the clinic?
- Or are you an academic doing mental health research, with a track record of using clinical data to answer your questions?

If the answer to either question is yes, we’d love to see your proposal for a project you could deliver using our platform. With data on the mental health journeys of more than half a million patients, imagine the insights you could gain!

The winner of the **NeuroBlu™ Award** receives a free 6-month subscription to the NeuroBlu™ platform, technical support, and an honorarium of € 3,000 to support their research. In return we simply ask that you tell us about what you learned from the platform, and participate in some publicity activities (for example, a joint press release).

The application process is very straightforward and can be completed in half an hour; simply fill out an online form with a description of your proposed research project and submit it to us before the deadline. If your idea is shortlisted, we’ll set up a call to discuss it in more detail. Then, if your proposal is ranked top by our team of experts, we’ll get back in touch to set up your award.

For more information:

- For general information on the NeuroBlu™ product, please visit: <https://www.neuroblu.ai/>
- To learn more about Holmusk, visit the company web site at: <https://www.holmusk.com/>
- Contact us at info@neuroblu.ai with any other questions (Please include “NeuroBlu Award” in your subject line – this will help us to route your message for immediate attention).
