

This course provides a general introduction to CAD. We have compiled a package of training and support material to get you to the point of producing simple 2D drawings quickly and without the pain.

## Who should attend

Anyone who is new to CAD that wants to gain the ability to create their own simple 2D drawings. The course training material incorporates general layouts, component drawings, and schematics as part of the exercises.

Whilst the training will be undertaken using [BricsCAD](#), the principals and commands learnt, along with the course material would be directly applicable to someone wanting to use AutoCAD® instead. [BricsCAD](#) is the number one DWG CAD alternative with a feature set and interface similar to AutoCAD®, including full DWG file compatibility, all for a fraction of the cost.

## What you receive

Attendees will receive the following:

- A Copy of the training material, which includes **sample templates, custom menu**, and some simple **symbol libraries** to get you started.
- A 30 day [BricsCAD](#) trial license allowing you to work with the software on your own machine.

## Content

The course covers the following topics:

- The BricsCAD user interface. Explore the drawing area, menus, and command line.
- Construction of simple drawings by creating and manipulating basic objects.
- Use of drawing tools to accurately construct and place objects.
- Drawing structure and organisation.
- Annotation and dimensioning.
- Inquiry commands, how to measure and find more information on drawing objects.
- How to re-use drawing content.
- Drawing layout, page setup and printing.
- How and where to find help.

## Duration & Requirements

The course is 18 hours total. Refreshments are provided. Day courses also include light meals.

**Course attendees need to provide their own Laptop.**

## Contact

## Terms and Conditions

1. *Your place is not confirmed until payment has been received. Please **pay immediately** to avoid disappointment.*
2. *If you wish to cancel or re-schedule for another course please do so at least **2 weeks** prior to the course. Otherwise payment of full course fee is required, and you will be re-scheduled for the next available course.*
3. *CAD Concepts may cancel or re-schedule courses due to insufficient enrolments or other unforeseen issues. CAD Concepts accepts no responsibility for any expenses that may have been incurred, such as travel, accommodation, etc.*
4. *You will be informed of any changes within a reasonable period. If a course is cancelled you will have the option to re-schedule for another course, or to receive a full refund.*
5. *Attendees are to provide their own Laptop for the duration of the course. CAD Concepts can provide equipment if requested, but this will incur additional costs.*
6. *Attendees receive a copy of the training material, which includes sample templates and a simple symbol library. CAD Concepts provides phone and email support on this material for one month following course completion.*
