

May 2023

Dear Fifth-Graders,

It has been a pleasure to be your math teacher this year. As you enjoy a well-deserved summer vacation, I want to remind you of the importance of keeping your math skills sharp. This packet is meant to give you weekly practice of your math skills. Each page covers concepts from each of our major units. I suggest you complete one page each week. It is not in your best interest to finish this packet in a couple of days.

Mrs. Nida, the 5th grade math teacher, will expect this completed packet from you on the first day back to school. Your work should be completed neatly. You must show your work. If you can't show your work on the pages provided, please attach any scratch paper you use. Make sure you complete all of the math boxes. Don't forget to use your math notebook to help you. You will also find a copy of this packet on the Holland Hall website.

Thank you for working so hard all year. I appreciate the effort you put forth in my class everyday. Please feel free to email me over the summer if you have any questions.

Have a great summer,

Ms. Molloy
smolloy@hollandhall.org

Once you've completed your summer work, please have your parents answer the following:

My child completed his/her summer work: (Please select one)

_____ Mostly independent

_____ Adult/sibling help was required to be successful

_____ My child worked with a tutor to complete summer work

Challenge Pages-Optional but strongly encouraged.

Use two numbers from the box to complete each addition problem below. You will use some numbers more than once.

97	204	297	405	498	607
----	-----	-----	-----	-----	-----

$$\begin{array}{r} \square \\ + \square \\ \hline 301 \end{array}$$

$$\begin{array}{r} \square \\ + \square \\ \hline 1,012 \end{array}$$

$$\begin{array}{r} \square \\ + \square \\ \hline 1,105 \end{array}$$

$$\begin{array}{r} \square \\ + \square \\ \hline 702 \end{array}$$

Complete these problems. There is more than one correct solution to the first two problems.

a

$$\begin{array}{r} \square 0 1 \\ - \square \square \\ \hline \square 6 7 \end{array}$$

b

$$\begin{array}{r} \square 7 \square \\ - \square \square 2 \\ \hline 3 \square \square \end{array}$$

c

$$\begin{array}{r} 86\square \\ - \square 4 1 \\ \hline 51\square \end{array}$$

Write an even number that has a 7 in the hundreds place, has an odd number in the thousands place, and is a multiple of 10.

The football team went out to eat after the game. The players sat at 4 tables. The coach ordered 9 pizzas. If each table got exactly the same amount of pizza, how many pizzas did each table get? Use labeled sketches, numbers, and/or words to solve this problem. Show all your work.

1 Use the number line to answer the questions below.

example a What improper fraction is equal to $2\frac{1}{4}$? In other words, how many fourths are in two and one-fourth?

$$\frac{9}{4}$$

example b What number is halfway between 2 and 3?

$$2\frac{1}{2}$$

a What improper fraction is equal to $1\frac{1}{2}$? In other words, how many halves are in one and one-half?

b What mixed number is equal to $\frac{6}{4}$?

c Which is greater, $\frac{5}{4}$ or $1\frac{1}{2}$?

d What mixed number is equal to $\frac{13}{4}$?

e What improper fraction is equal to $2\frac{1}{2}$? In other words, how many halves are in two and one-half?

f Which is greater, $1\frac{3}{4}$ or $\frac{8}{4}$?

Lisa and her brother Darius were eating small pizzas. Their mom cut each pizza into fourths. Lisa figured out that she ate one and a half little pizzas. Darius counted that he ate seven fourths. Who ate more pizza? How much more? Use a labeled sketch, numbers, and/or words to prove your answer.

DIGIT DETECTIVE

Cross off the numbers that fit each clue. Only one number will be left.

Multiple of 9	Prime number	Days in 15 weeks
$\frac{4}{5}$ of 100	$192 \div 6$	$150 + 10 \times 3$

What number am I?

SQUARE

In each puzzle, fill the white squares with the numbers 5-10 (with no repeats), so the gray squares equal the product of each row and column.
