Light Paper

# spacedawgs

**SpaceDawgs (\$DAWGS)** is a utility meme token with the primary goal to put crypto in the hands of every person on Earth. **\$DAWGS** will have a multi-asset, multi-chain digital wallet and a related Space Card that will be disruptive with cutting-edge technology and usability. **\$DAWGS** tokenomics are well suited for the mission and have built-in rewards for holders, burn, DAO, and charity contribution. The **\$DAWGS** contract was a fair launch on Uniswap on July 7<sup>th</sup> and renounced on July 9<sup>th</sup>.

## Vision Statement

**SpaceDawgs** is a crypto/financial utility project, built to empower users to invest and transact conveniently and easily while supporting planetary wellbeing.

# Values

**Utility** The creation of SpaceDawgs was inspired by the fun world of meme coins and exciting breakthroughs in the realm of decentralized finance (DeFi). In addition to the global cultural icon of SpaceDawgs, we created an investable asset with sound tokenomics that rewards holders financially and socially, coupled with an ever-expanding platform of financial utility for users. The first utility components will include a digital crypto wallet leveraging Open-Transactions technology to power a family of crypto custody cards. Following this, we plan to roll out DeFi crypto credit/debit cards linked to the SpaceDawgs ecosystem.

**Community** is at the heart of the SpaceDawgs project. Beginning with a core team who crafted the project's vision and are responsible for driving the project's roadmap, the SpaceDawgs community has rapidly grown into a decentralized movement of content creators, technologists, prominent crypto community members, and most importantly, holders. The SpaceDawgs community serves as a cornerstone of knowledge-sharing, diversity, network connections, and expertise.

**Sustainability** SpaceDawgs is built on the Ethereum network, which will be moving to Proof of Stake (PoS) mining in the coming months. This will result in a level of energy consumption per transaction that uses **30,000x less energy than Bitcoin**.

SpaceDawgs has a built-in charity, funded through transactions, that supports various clean water initiatives worldwide. SpaceDawgs is also a member of the **Crypto Climate Accord**.

**Asset Growth** With ambitious goals, SpaceDawgs seeks to appreciate in value and provide an continually evolving set of financial products and services to the world. In our current economy of ever-printed money, we believe a limited-supply deflationary token with holder rewards functionality, like SpaceDawgs, is well positioned for future growth.

**Platform** Building from a foundation that is both financially accretive and socially responsible, SpaceDawgs will add progressive utility and value to the ecosystem by building out the following platform.

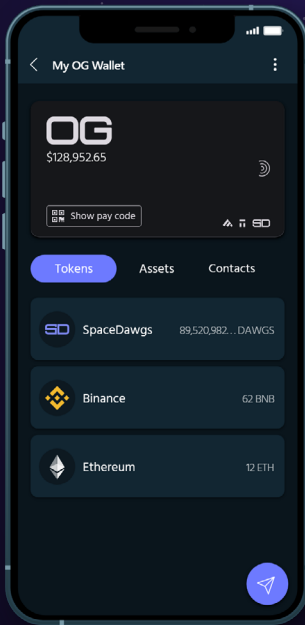

**\$DAWGS**

The digital asset is designed to serve as a store of value and a medium of exchange. Based on the Ethereum network ERC-20 standard, the \$DAWGS token serves as the bedrock element of the SpaceDawgs technology ecosystem.

**Dawgs Wallet**

The Dawgs Wallet uses **Open-Transactions** technology, developed by our partners at MatterFi. Open-Transactions is a collaborative, open-source effort to develop a robust, commercial-grade technology stack, consisting of cryptography, software applications, servers, APIs, GUIs, and protocols that enable the creation of a broad class of financial instruments and decentralized financial functions. OT technology represents a major leap forward in security, enabling true, on-chain self-custody and providing best-in-class privacy and security.

The Dawgs Wallet enables in-wallet, off-chain cryptographic voting, which empowers community decision-making as well as SpaceDawgs DAO governance. All votes can be tracked and tabulated in a transparent fashion and in real time.

Through an exclusive partnership with MatterFi, SpaceDawgs will also be providing Dawgs Wallets to other meme coin partners. We look forward to bringing advanced DeFi utility to other quality meme projects seeking to offer their communities a best-in-class user experience.

## Space Card

By the fourth quarter of 2021, it is projected that wallet owners will have access to a completely secure, Dawg-branded, credit-card-like device that is linked to their Dawgs Wallet. Any wallet asset can be transacted via a card tap, controlled through the wallet owner's phone.

**Security** A lost card is useless to anyone else since they do not have the user's mobile phone or the user's unique pin code to access the card. Users can purchase a new card for a small replacement fee and re-create their account using their seed phrase or re-create their account from their seed on their mobile wallet. This is the future of mobile (offline) cold wallet usage — secure on-chain custody held offline using the Space Card digital safe.

## Coinbase Card

## Space Card

Keeps your valuable crypto assets safe and not on a hackable exchange

Allows you to easily swap and spend any coins on approved blockchains

Protects your privacy by not having trackable public wallet addresses

Credit and debit card functionality

Escalating card status and rewards based on holdings

Reserve your preferred card number via an NFT function

# Tokenomics

## \$DAWGS: a store of value, a medium of exchange

- 1 trillion \$DAWGS
- Fair launch
- No pre-sale
- 2.5% transaction fee, divided as follows:
  - 1.00% - \$DAWGS holders rewards
  - 0.75% - Burn
  - 0.25% - Charity
  - 0.25% - DAO
  - 0.25% - Developers

### \$DAWGS holders rewards

0.5% of every \$DAWGS transfer is distributed evenly to all holders of \$DAWGS. Additionally, 0.5% is distributed from the DAO and Charity wallets evenly among holders of \$DAWGS at key project milestones and events.

### Burn

0.75% of every \$DAWGS transfer is removed from circulation, making \$DAWGS a deflationary asset.

Burned tokens are sent to 0x0000..000 - <https://etherscan.io/token/0x9f8eef61b1ad834b-44c089dbf33eb854746a6bf9?a=0x00>

### Charity

0.5% of every \$DAWGS transfer is distributed to the SpaceDawgs charity wallet 0x0aF7CE-4Da2AE1D2eb4F31E8935728Dbcf54aF5d5 to fund the SpaceDawgs charity initiatives. Half of all charity fees are provided as key project milestone redistributions to all holders.

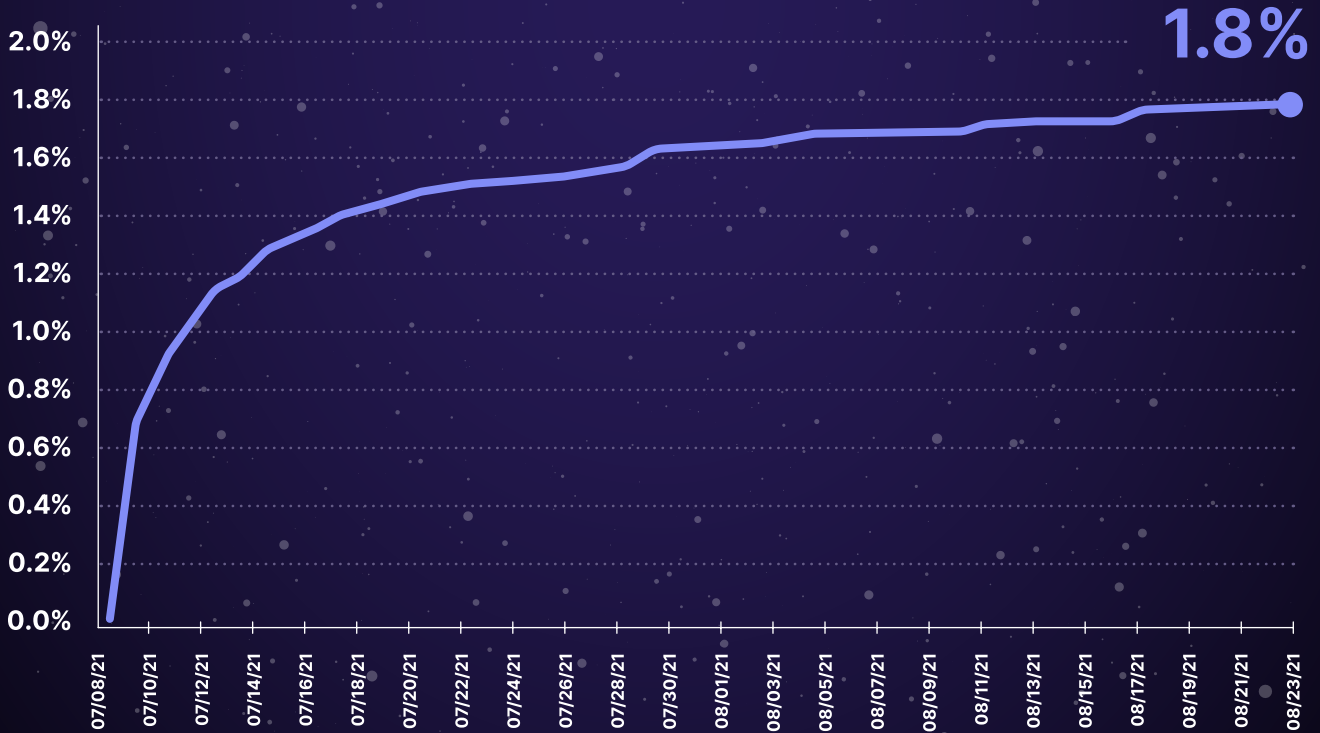

## DAO

0.5% of every \$DAWGS transfer is distributed to the SpaceDawgs DAO wallet [0x0fe53E-a2b9cf5411CE79BD0D57dFaA1789AeFbB5](#). The mission of the SpaceDawgs DAO is to spearhead the development of DeFi offerings to SpaceDawgs users, harness input and feedback from the broader SpaceDawgs community, and provide operational support to the SpaceDawgs charity. Half of all DAO fees are provided as key project milestone redistributions to all holders. The timing to distribute fees to holders will be initiated through voting by all \$DAWGS holders, using the SpaceDawgs wallet.

## Developers

0.25% of every \$DAWGS transfer is distributed to the SpaceDawgs Developer fund wallet [0xc52Bdc8e2f9D72bC01552E9DA0fEe2EdeEb5179e](#)

### SpaceDawgs Burn Function

# Roadmap

## Phase 1 (Now)

- **\$DAWGS token deployed to Ethereum main net**
- **\$DAWGS marketing initial activation**
- **Deployment of contract to Uniswap decentralized exchange**
- **Launch on initial centralized crypto exchanges**
- **Light Paper release**
- **Coingecko listing**

## Phase 2 (Wallet Development)

- **Development of SpaceDawgs wallet**
- **Onboarding payments processor partners**
- **Creation of “card reservation” NFTs**
- **CoinMarketCap listing**

## Phase 3 (Custody Card Delivery)

- **Crypto custody cards delivered to initial users**
- **SpaceDawgs staking mechanism implemented**
- **SpaceDawgs wallet released to iOS App Store**
- **Rollout of SpaceDawgs server farm**
- **Integration of SpaceDawgs partner bank**

## Phase 4 (DeFi Visa Delivery)

- **Initial users receive SpaceDawgs debit/credit Visa cards**
- **“Purchase crypto using fiat” functionality available to users**
