What is COVID-19?

Facts and Data Sheets

<https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/COVID-19-Factsheet-English.pdf>

COVID-19 is a new coronavirus. It can cause a mild illness, such as a cold, or a serious illness, such as pneumonia. There are no treatments or vaccines to combat it. It is spread through tiny drops of moisture when an infected person sneezes, coughs, or talks.

Symptoms: Fever, chills, cough, shortness of breath, fatigue, muscle pain, headache, loss of taste or smell, sore throat, stuffy or runny nose, nausea, vomiting, diarrhea. If you have these symptoms, stay home and call your healthcare provider. **People at high risk for serious illness:**

- Older than 65 years or older
- People who live in a care center
- People who have a medical condition or a weakened immune system.

How to prevent the spread of COVID-19:

Stay home as much as possible. Stay 6 feet away from people who do not live with you. Wear a cloth mask so you don't spread your germs.

Recommendations against COVID-19:

- Protect your health.
- Wash your hands frequently with warm soapy water
- Rub them in for 20 seconds.
- Cover when you cough or sneeze.
- Use a handkerchief or the crease of the elbow.
- Do not touch your face or the cloth mask if you didn't wash your hands.
- Avoid contact with sick people.
- If you are sick, stay home and away from other people.
- Keep a distance of 6 feet.

HELP OUR VALLEY Reopen & STAY OPEN - SAFELY!
We all want to get back to a more normal routine, here's how you can help our Valley get there.

Ayude a que nuestro valle pueda Reabrir
¡Y se mantenga abierto de una manera segura!

Todos queremos volver a una rutina más normal, así es cómo puede ayudar a nuestro valle

WEAR A FACE MASK when in public
SOCIAL DISTANCE as much as possible

AVOID GROUPS and gatherings
WASH YOUR HANDS or use hand sanitizer

CUANDO ESTE EN PÚBLICO, UTILICE UNA MASCARILLA
DISTANCIAMIENTO SOCIAL en que más le sea posible

EVITE LA CONGREGACIÓN de grupos y las reuniones
LÁVESE LAS MANOS o use desinfectante de manos

For more information about fighting the spread of the COVID-19 virus, visit www.cdhd.wa.gov/covid-19.

Para obtener más información sobre la lucha contra la propagación del virus COVID-19, visite www.cdhd.wa.gov/covid-19.

COVID-19: What is Contact Tracing?

What will they ask me if I tested positive?

<https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/CT-WhatToExpectPositiveEnglish.pdf>

What will they ask me? (overview)

<https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/CT-WhatToExpectOnePagerEnglish.pdf>

Contact tracing is a way to identify people who might have COVID-19. Help track and prevent the spread of COVID-19. It starts with a person who has tested positive for COVID-19, results are obtained through the Washington State Department of Health or Health Provider.

1. An investigator will call you to see how you are doing and they will ask you to confirm your information, your name, address, date of birth and race / ethnicity (they will not ask for a Social Security number, immigration status or financial information)
2. You will be asked to stay home for at least 10 days after the first symptoms, three days after the fever has dropped or whichever lasts the longest.
3. You will be asked about your symptoms: Fever? Difficulty breathing? Cough or muscle pain? Shaking chills? Sore throat? Symptoms can be mild or severe. They can take up to 14 days to present.
4. You will be asked where you have been, with whom you have had close contact, what health conditions you suffer from that could increase your risk or cause severe illness.
5. Contact close people who may be at risk. For example, people who have been 6 feet away from the patient for more than 15 minutes. People who have been near the patient while coughing or sneezing. People who have cared for you or who live in the same house.
6. If you were the one who was exposed to a positive case, they will not tell you who could have infected you with covid-19. Those who are considered close contacts should be quarantined. Quarantine means that they must stay home and monitor their health for 14 days after having contact with the sick person.
7. When the interview is over, the interviewer will provide you with the necessary information and resources so that you know the steps to follow.

Note: Participation is voluntary. All the information you provide is confidential and your health information is protected by law. Interpreters are available.

Monitor your health. Call a healthcare provider if your symptoms get worse.

Quarantine vs. Isolation

What is the difference?

https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/IsolationQuarantine_English.pdf

Quarantine

If you were exposed to COVID-19 but don't have symptoms, you will be asked to do QUARANTINE. Why? To avoid spreading the virus before you know if you are sick. How? Stay home and avoid contact with anyone who is not a household member. Should I get tested? Contact your healthcare provider if you: Have symptoms of COVID-19; or were in close contact with someone who has COVID-19; or you are in contact with many people where you live or work. If you test positive for COVID-19 or have symptoms during quarantine, you will need to ISOLATE. End of quarantine: Fourteen days after the last contact with a sick person.

Isolation

If you test positive for COVID-19 or have symptoms, you will need to ISOLATE. Why? To avoid spreading the disease. How? Stay home and avoid contact with other people (including household members). Stay in a separate room and use a separate bathroom, if possible. End of isolation: At least 24 hours after the fever has disappeared without using medication. And after all other symptoms have improved (for example, coughing and shortness of breath). Ten days after the last contact with a sick person.

To be referred to our Isolation and Quarantine facility you need a referral from

Confluence Health, CDHD, CVCH, Cascade Medical Center, Lake Chelan Hospital, local shelters or care centers, etc.

If you have questions:

Emergency Coordinator | Jim Kaing | Jim@ServeWenatchee.org

Where to Get Tested for COVID-19

Confluence Health

615 N Emerson Ave
Wenatchee, WA 98801
Monday to Friday 8:30am a 4:30pm.
Saturday 8:30am a 12pm.
Phone 509-663-8711

Columbia Valley Community Health

600 Orondo Ave. Suite 1
Wenatchee, WA 98801
Monday to Friday 8am a 6pm.
Saturday 8:30am a 4pm.
Phone 509-662-6000

The test is free if you have symptoms or were exposed. Call your doctor for a referral or call the clinic directly. Your insurance or employer will be charged if you are testing due to your employer's referral.

If you were exposed or are having symptoms, a doctor can see you without an appointment. If you don't have insurance, they offer sliding scale discounts, but they can also help you apply for a program that can cover the appointment and test.
