Re: Letter of Recommendation

To Whom it May Concern:

I am pleased to provide this letter of recommendation for those considering working with WC Construction, general contractor.

I first used WC Construction on several small tenant buildouts. I was impressed with their onsite organization, ability to deliver projects on aggressive schedules with a high quality of work, and consistent communication of the project from beginning to end. When the time came to build our new office, I chose to award them the project. It was a 3,200sf ground-up, design-build, corporate office build-to-suit. The project was extremely well done and completed in an impressive 8 weeks, way ahead of schedule. We continue to use WC Construction almost exclusively and currently have a 10-acre development consisting of an additional Business Park involving sitework, detention expansion, core and shell buildings and secure RV parking.

Will Carter with WC Construction has been a pleasure to build a working relationship with, and I would highly recommend him for any project.

Sincerely,

A handwritten signature in black ink, appearing to read "James West", written over a horizontal line.

James West
