

InTouch is the essential mobile tool for all cinema staff – be they managers or ushers – that supports their workflows.

Benefits

- Enable managers to monitor and respond to daily cinema operations on the go, wherever they are in the cinema.
- Free up managers to spend more time with staff and customers, while overseeing key business tasks associated with revenue and profitability.
- Provide a smooth customer experience through your cinema with your staff 'scanning' guests into their sessions and with refined in-seat dining through Food & Beverage integration.
- Streamline the workflow of kitchen staff and servers with quick and easy food service summaries of exactly what items and how many are needed for a specific session.

Keep your cinema humming

InTouch empowers your cinema staff to complete their workflow faster, and to keep track of all the goings-on of your cinema every step of the way. Remote authorisation allows request notifications for a manager's approval to be sent directly to them, and for them to accept requests no matter where they are, saving time for all involved.

Stay on top of your cinema with an intuitive schedule view that helps your staff manage both in-progress and upcoming sessions. Location Checks allow you to make sure every part of your cinema meets your standards of service, with a comprehensive check

history that covers any liability concerns and allows a spot-by-spot view of what's happening in your cinema. Locations can be set up for daily inspection so that you can be confident that every check is completed regularly, and any issues are quickly addressed.

Flexible devices

InTouch is designed specifically for both smartphones and tablets, maximising the use and layout of whatever device you use. Have the freedom to choose your devices, too, as InTouch works on both iOS and Android, across all of their smartphone and tablet options. Ushers can scan tickets with the in-built cameras on their devices, and easily keep track of all admits and manage sessions accurately and efficiently, while eliminating any hassle for guests.

Empower your staff

You can integrate your Food and Beverage operation workflow seamlessly into your customer's cinema experience. Scan bookings and associate them with food orders easily, firing orders off to the kitchen and ensuring your guests get their in-seat service fresh and on-time. Sort, swap, and break seats directly from the app – your ushers have the ability to resolve any seating issues right on the spot and keep your guests happy.
