

good Legislation

We believe in our patients' rights and here are some of the bills we support.

If you want to support the cause, click the links below to write a letter to your elected officials.

Home Grow for Medical Marijuana Patients

If passed, this would allow medical marijuana patients 21+ to grow and cultivate up to six plants in an enclosed space in their own residence. Currently under state law, patients are not permitted to grow their own medicine and are subject to stiff fines and penalties if caught.

Decriminalization

If passed, this would decriminalize the possession of up to 30 grams of marijuana, and instead a fine of \$25 would be imposed with no possibility of jail time. The penalty for smoking in public would become a summary offense punishable by only a \$100 fine. The bill also mandates that a violation will no longer result in any driver's license suspension.

Expanding Program to Include Edibles

If passed, this would allow the state to expand the program to include edible medications beyond pills, tinctures, and liquids.

Many patients require gradual, long-term relief, and edible cannabis medication is among the best ways to achieve it.

Adult-Use Legalization

We believe that all adults 21 and older should have unrestricted access to legal, and safe marijuana products. Individuals have a variety of reasons for adding cannabis to their routines and shouldn't always need medical oversight to do so. Adult use is about empowering individuals to take control over their own well being.
