

TPC Kids Health Policy

We ask that all families and TPC KIDS volunteers to observe and respect the following expectations to keep our kids healthy and safe.

Regardless of explanation or diagnosis provided by parent, children with the following symptoms within the last 24 hours should not participate in on-site programming:

- Fever above 100.4 degrees
- Fatigue
- Sore throat
- Diarrhea
- Vomiting
- New uncontrolled cough that causes difficulty breathing.
- Pink Eye or other eye infections (the child must be on medication for 24 hours and exhibiting no symptoms)
- Eye drainage
- Runny nose that's cloudy, green or yellow
- Croup
- Persistent cough
- Common cold (from onset through one week)
- Any communicable disease
- Any unexplained rash

Please do a temperature check at home. If you or your child has a temperature of 100.4 or higher, please worship with us from home using our on-line resources.

- At no time will any volunteer administer any medication to any child.

Check-in Guidelines

- Check-in volunteers will check all families in digitally.
- Clear signage will be present which asks parents to not check their child in with TPC Kids if they have any of the listed symptoms.
- Our rooms are cleaned each week prior to the weekend service experiences.

Thank you for your cooperation in helping us keep our kids healthy!
