

Doubles Plus One

Finish solving the doubles plus one equation.

$$\square = 3 + 4$$

$$\square = 3 + \square + 1$$

$$\square = \square + 1$$

$$6 + 7 = \square$$

$$6 + \square + 1 = \square$$

$$\square + 1 = \square$$

Solve the word problem using the doubles plus one strategy.

1. Mia has 5 colored pencils and 6 regular pencils. How many does she have in all?

$$5 + 6 = \square$$

$$5 + \square + 1 = \square$$

$$\square + 1 = \square$$

2. Latiffa invited 8 girls and 9 boys to her birthday party. How many friends did she invite in total?

$$8 + 9 = \square$$

$$8 + \square + 1 = \square$$

$$\square + 1 = \square$$
