

# CALAMP 730

Non-Powered Asset Tracker

The Calamp 730 non-powered asset tracker has a long-life battery that provides up to three years of asset location reporting. Configured to report back twice daily, this device keeps you updated on assets such as roll-offs or trailers with long field deployments where external battery power is not available. Its weatherproof casing is ideal for extreme and rugged environments.

## INSTALLATION OVERVIEW

This device must be mounted with four screws through the holes in the mounting flanges. Use pre-drilled holes and/or self-tapping screws to securely affix the device to your asset.

To maximize GPS reception, the device must be mounted with its top pointing either up or down (not sideways). The top side of the device can be found opposite the mounting flanges. If the magnet is still affixed to the tracker with tape, remove it. The device must not be fully enclosed in a metal housing, and it must have adequate cellular network coverage to transmit asset data and location.

## SPECIFICATIONS

Power Requirements	Internal Battery – Non-Rechargeable
Battery	3.6V / 57Ah Lithium Primary
Battery Life	Up to 3 years
Operating Temperature	-30° to +65° C
IP Rating	IP67
Network	LTE Cat 1
Dimensions	9.9" (L) x 2.35" (W) x 2.45" (D)
Weight	23.2 oz
SW / FW Updateable Over-the-Air
