

EQUIPMENTSHARE RENTALS ARRIVE ON TIME, UNDER BUDGET AND ALWAYS READY TO GO.

Unlike other rental companies, our rental and fleet operations are powered by T3, a digitally connected platform, to give customers a streamlined rental experience that saves them time and money. Say goodbye to the days of hoarding a yard full of unused equipment, or wondering if the equipment has been properly maintained.

With more than 100 rental locations around the country and growing, builders have access to affordable next-generation machines — each one with tech hardware that can track and store vehicle health and usage data.

Equipment from the brands you know and trust.

“We saved more than \$50,000 using EquipmentShare over another rental provider in the area. We had such a good experience with them that we consolidated our entire rental business over to them. Now, we only rent from EquipmentShare.”

Flash Trucking and South Texas Frac

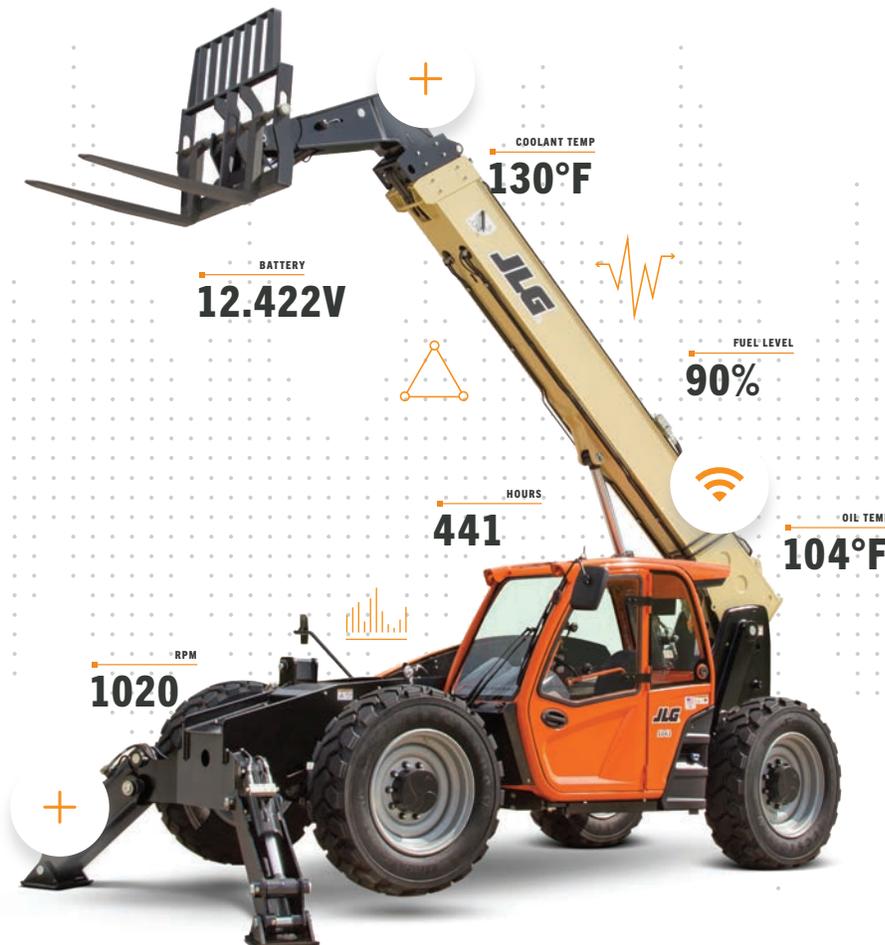

Best Rental Experience

- Rent equipment when you need it. Off-rent it when you don't.
- Create geofencing and utilization reports to control your jobsite and rental spend.
- GPS and access keypads tell you where your machines are at all times and who's using them. Administrators can also easily change access codes from anywhere with their phone or computer.
- Know when your rental machine leaves our yard and when it's on its way to yours.
- Our service team and tech can use our T3 tech to quickly and easily mitigate repairs and reduce downtime.

Tech + Team = Best in the Business

Our dedicated rental and service team use T3 technology to help you prevent machine breakdowns, off-rent idle equipment and identify ways to save money.

We know. It's not what you expect from an equipment rental company. It's better.
