

ERP Managed Operations

Continuously improving, always compliant

Managed Operations ensure that you are continuously improving and always compliant.

Once a cloud-based system is implemented, new compliance challenges can arise. From forced system releases to testing and re-validation of processes, being compliant is a continuous effort that needs to be skillfully managed.

Solution

Our expert team monitors your compliance levels and ensures you stay on top of potential challenges caused by forced releases. We evaluate the potential impact of releases before they happen and ensure smooth transitions. In between, we keep driving improvements. Our automated testing and control ensure compliance is maintained.

Considerations

Are you struggling to get the most out of your IT systems over time? Epista's Managed Operations can help by providing an expert team focused on ensuring compliance while increasing business value. You'll successfully adopt forced releases while continuously improving based on requirements without the overhead from having a dedicated in-house team with specialized expertise.

With Epista, you can:

Trust you are in control:

Release management lets you stay ahead of potential issues while optimizing value.

Have confidence your business requirements are being met:

Improvements and system change management optimize your process and systems to continuously increase business value.

Rest assured someone is always there to provide support:

System administration and support gives you quick reaction time to any potential issues.

Get in touch to learn how Epista can provide a flexible and available expert team to ensure you continuously improve and are always compliant.
