Needs Analysis & System Selection

Translating your priorities into clear choices

Needs Analysis & System Selection helps you translate your business priorities into the right system decisions.

At the intersection of business and compliance, informed decisions can be difficult. Options are many and the tradeoffs between compliance and efficiency are often unclear. Whether it is about transitioning to new cloud-based systems or upgrading existing technology, specialized expertise is required.

Solution
Our many years of experience provide us with deep understanding of both the current system landscape and upcoming trends. We help you turn your business strategy and goals into actionable decisions, to create a digital platform for your future.

Considerations
If you are transitioning to a new IT system or upgrading your existing system, Epista's Needs Analysis & System Selection service will help you to make informed decisions about which IT systems to choose. We'll provide recommendations based on the critical success factors underlying your business, unlike other approaches that treat business strategy and IT systems as separate.

With Epista, you can:

Trust that your business is well understood:
Defining critical success factors gives you a clear overview of what matters.

Be confident that you're making the right choice:
Linking success factors to IT and compliance creates the highest potential impact on the business.

Rely on Epista's decision support:
Get the expert recommendations you need to make informed decisions.

Get in touch to learn how Epista can help you translate your business priorities into the right system decisions.
