

LoKr™

TECHNICALLY ADVANCED LOW K_R RUPTURE DISC

*The highly engineered rupture disc design offers the **widest bore opening possible on burst**, allowing you to **use smaller pipe diameters to reduce cost with no compromise on performance.***

Delivering a best-in-class Flow Resistance Factor (FRF) or K_R , the LoKr is designed to improve process performance and efficiency. The advanced design maximizes performance in three areas: keeping pressure drops in relief lines to a minimum, delivering maximum reliability, and being suitable for the widest range of pressures, temperatures, and line sizes possible.

The dimple design enables full-bore opening with exceptionally accurate burst ratings. This supports operational efficiency, especially at low flow rates, and makes it easier to keep pressure drops across the relief line below 3%.

Size	1"-12"
Burst Pressure	10 - 2,500 psig
Temperature	-120°F to 1000°F
K_R Value (K_{RGL})	0.22
Operating Ratio	95%
Performance Tolerance	+/-5%
Manufacturing Range	0%

TECHNICAL SPECIFICATIONS

Size range	1"-12" (25-300mm)
Burst pressure range	10-2,500 psig (0.69-172.3 barg)
Temperature range	-120°F to 1000°F (-84°C to 538°C)
Standard materials	Hastelloy® C, 316 Series Stainless Steel, Nickel, Inconel® 600, Monel®
K _R Value	K _{RGL} : 0.22
Max. Operating Ratio	95%
Performance Tolerance	+/-5%
Manufacturing Range	0%
Fragmentation	Non-fragmenting design
Vacuum Service	Withstands full vacuum (14.7 psi) without separate vacuum support
Fluid compatibility	Gas service and liquid service
Torque requirements	Non torque-sensitive
Cycling or static service	Suitable for high-cycling applications (tested to 1 million cycles)
Relief Valve Isolation	Suitable for safety relief valve isolation
Leak tightness	Helium Leak checked to 1x10 ⁻⁸ cc-atm/sec
Design Standards	Designed to meet ASME Section XIII standards

Certifications
