

Compact Module Play

Made in Australia
Concepts and Design © Playtec Pty Ltd

Compact Module Play is a mini, two level soft play playground that is unrivalled in its ease and speed of installation. Catering to infants and toddlers with good gross motor skills, Compact Module Play offers children up to six years of age an opportunity to climb, slide and squeeze with much higher levels of safety than conventional playgrounds.

Compact Module Play is pre-assembled in our factory prior to shipping and there are no requirements for rubber safety flooring or bolting into your floor. It is quick to install and under most circumstances it can be installed by clients themselves. You can expect an 80% saving on installation time and cost compared to conventional soft play playgrounds. If the need ever arises to dismantle, move or change the playground, it can be done quickly without damaging the play equipment, saving clients thousands of dollars.

Choose from our pre-designed examples in this brochure, or ask Playtec to tailor a design unique to your site requirements.

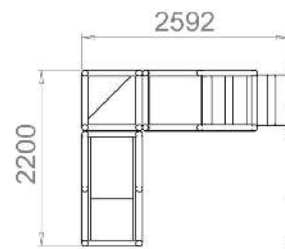

ALL DESIGNS ARE AVAILABLE WITH OR WITHOUT BALL POOLS
