

# Play Pods

Made in Australia  
Concepts and Design © Playtec Pty Ltd

Play Pods are ultra-compact playgrounds for children aged up to five. Designed for areas where space is limited, Play Pods are less intrusive playgrounds. Play Pods have play events often only found in elevated playgrounds and because everything is less than 1.3 metres in height, their small size makes them suitable for narrow public areas. The frames are fabricated from steel, so you know they are strong, and then coated in safety foam for added child protection. Play Pods can be installed quickly, without bolting to the floor and should the need arise to move them, the Pods are easily separated, relocated and reinstalled. The following Play Pod library examples include safety flooring, play events and even provision for branding & rules and regulation signs. With Play Pods making a child friendly impression has never been more affordable.
