

Silo is designed for clients who want a fully contained, indoor playground solution catering for children up to ten years of age. Silo playgrounds can be dismantled, changed or relocated as your needs change; they take up very little space whilst offering high levels of safety and play capacity. Silos unique circular, contained play environment prevents falls and offers a distinct entry/exit that is easily supervised, making it an ideal solution for businesses that want to attract parents by freeing them up from the distractions of bored, tired and roaming children.

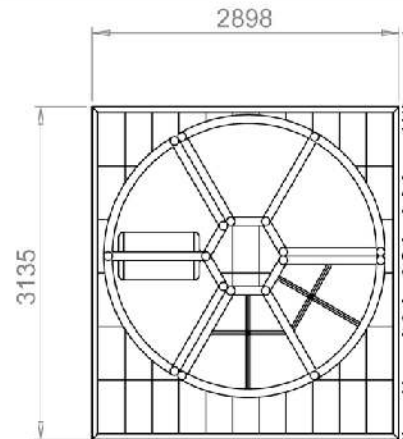

Playtec design different sizes of Silo Playlands to suit different businesses. If you are a business wanting to make a child friendly statement, Silo will entertain the children of parents that visit your business with the likelihood they will visit more often, stay longer and spend more. Select from one of our proven designs or we can design Silo to suit your needs.

## Silo 1P
