All prices exclude VAT. Number of "Schemes" is defined by the unique EmployerIDs that are connected to the user's PensionSync account, e.g. how many clients' pension schemes they are managing. Fair Use: All scheme usage is for a maximum of 500 employees - we will apply multiplier of the scheme cost for each set of additional 500 employees or part thereof.

Frequently Asked Questions

How will the billing work?

Billing couldn't be easier. We'll collect your monthly payment by Direct Debit. If the number of schemes you are managing changes, your monthly invoice will automatically update to reflect this.

Will it happen automatically?

You will automatically be assigned the best price plan for you based on the number of schemes you are managing. If you don't already have a Direct Debit in place you'll be automatically asked to set one up.

Do I need to do anything?

The first time you log in to PensionSync after the new price plan takes effect you will be asked to agree to the new price plan. If you haven't already got a Direct Debit in place you will be prompted to set one up.

Is it easy to switch plans?

Yes. Simply contact support@pensionsync.com and we can help you find the best option for you.
