

One API. Endless Innovation.

The Particle Health API provides access to **90%** of Acute EMRs and **60%** of Ambulatory EMRs in the United States.

Our network covers **200+ million** unique patient lives and with a simple query returns full clinical data sets from EMR vendors, including:

You'll get a 360-view of patients with documents aggregated from:

- Hospital
- Medical Systems
- Surgical Facilities
- Clinics
- Doctor Offices
- Specialists
- Ambulatory Facilities
- Urgent Care

These documents types include:

- Continuity of Care
- Hospital Encounter Summary
- Lab Orders
- Office Visit Summary
- Refill Summary
- Transition of Care

With these documents, you'll find robust clinical information including:

- Allergies
- Admissions
- Family History
- Immunizations
- Labs
- Medications
- Plans of Care
- Procedural Information
- Social History
- Vitals
- Visit Notes
