Title: Deletion of RAS Listing in Publication Index

Effectivity

Dornier 328 all Type Certificate Data Sheet EASA.A.096 Serial No.: All Aircraft

Dear Valued Customer,

328 Support services will not be list Repair Approval Sheets (RAS) in Chapter 3 of the Publication Index any longer and instead provide a reference to Appendix 3 of the Airworthiness limitations Document (ALD).

As before, information on RAS will be published in the ALD Appendix 3 – List of Inspection Requirements for Major Repairs.

A listing of all RAS published and considered valid (Minor and Major) for each aircraft can be supplied by 328 Support Services on request. If required we kindly ask you to contact our Global Support Center.

Please note that operators, having RAS with inspection requirements not valid anymore, should inform the Global Support Center accordingly in writing, so the RAS can be officially revoked.

With best regards / Mit freundlichen Grüßen

ppa. Florian Luithlen i.V. Conny Uihlein **Director Customer Support** Manager Customer
