

**TRANSPORT.S3**

## The safest and most reliable Internet/ WAN File Transfer Tool

Transport.S3 harnesses the latest Internet Protocol (IP) technologies to provide a swift and painless process to securely transfer your data over the Internet, fast and error free (unlike TCP/IP). Utilizing the powerful UDP protocol, a small lightweight transport layer on top of IP, you are no longer subject to FTP hijacking and packet losses as UDP sends your data in batches of packets that only the source and target devices can accurately reassemble at the bit level (Bazinga Secure!!).
