

LongPath Technologies uses Nobel Prize-winning laser technology to mitigate greenhouse gas emissions from the natural gas supply chain. We are a unique and proven continuous methane emissions monitoring system that mitigates climate risk while providing high-value monitoring at a low cost to oil and gas customers. We are looking for key individuals to join our talented, dynamic team

LongPath is seeking a **Full Stack Engineer** to manage and develop a web application and other data delivery services for the customer. We are a small and fast-growing company, so the position offers a large amount of both freedom and responsibility.

What You'll Do

- Web application development and maintenance
- Database integration and management
- Data product development and integration
- Improve data handling for internal processing
- Research and select libraries and packages to streamline development

Essential Skills

- Angular framework mastery
- Typescript and Javascript, Nativescript, NestJS, and NodeJS
- Git
- BS or higher in a technical discipline
- Strong written and oral technical communication skills
- Ability to work both independently and in team environments
- Self-motivation to learn new skills and push your technical boundaries

Desired Skills

- AWS, MongoDB, Python

Working Conditions

- Preference for primary job location in Boulder, CO; strong remote work applicants encouraged to apply

To Apply

Please email jobs@longpathtech.com with a copy of your resume. We look forward to speaking with you!
