

## Iso-Vet® 1000 mg/ml

Isoflurane is indicated for induction and maintenance of general anaesthesia.

Isoflurane should be administered using an accurately calibrated vaporiser in an appropriate anaesthetic circuit, since levels of anaesthesia may be altered rapidly and easily.

- Isoflurane may be used in conjunction with other drugs commonly used in veterinary anaesthetic regimes for premedication, induction and analgesia.
- Recovery from isoflurane anaesthesia is usually smooth and rapid.
- Iso-Vet has a shelf life of 5 years.

<b>Active</b>	Isoflurane 1000mg/ml
<b>Species</b>	Cats, Dogs, Horses, Small mammals, Ornamental Birds & Reptiles
<b>Routes of administration</b>	Inhalation
<b>Pack Size</b>	250ml
<b>Legal Category</b>	POM-V, VPO

# Iso-Vet® 1000 mg/ml

## Isoflurane may be administered in oxygen or oxygen/nitrous oxide mixtures.

The MAC (minimal alveolar concentration in oxygen) or effective dose ED50 values and suggested concentrations given for the target species should be used as a guide or starting point only. The actual concentrations required in practice will depend on many variables, including the concomitant use of other drugs during the anaesthetic procedure and the clinical status of the patient.

Isoflurane may be used in conjunction with other drugs commonly used in veterinary anaesthetic regimes for premedication, induction and analgesia.

The lowest effective dose should be administered, and, as with all anaesthetics, the correct dose is the minimum that achieves the desired anaesthetic.

Species	MAC (%)	Induction (%)	Maintenance (%)	Recovery
Horse	1.31	3.0 - 5.0 (Foals)	1.5 - 2.5	Smooth and Rapid
Dogs	1.28	Up to 5.0	1.5 - 2.5	Smooth and Rapid
Cats	1.63	Up to 4.0	1.5 - 3	Smooth and Rapid
Ornamental Birds	See Posology	3.0 - 5.0	See Posology	Smooth and Rapid
Reptiles	See Posology	2.0 - 4.0	1.0 - 3.0	Smooth and Rapid
Rats, Mice, Hamsters, Chinchillas, Rabbits, Guinea Pigs and Ferrets	1.34 (Mouse)	2.0 - 3.0	0.25 - 2.0	Smooth and Rapid
	1.38 / 1.46 / 2.40 (Rat)			

The dosage amounts are based on the dose rate in the product SPC. Dosage amounts should be tailored to the individual patient depending on the status, indication, combination of drugs used and the required level of sedation. Iso-Vet 1000mg/g Inhalation Vapour contains Isoflurane 1000mg/g.

Refer to product packaging and leaflets for full indications, side effects, precautions, warnings and contra-indications.

### Use medicines responsibly.
