

# CoreView for Higher Education

Everything you need to get full value, gain full oversight,  
and move at full speed within Microsoft 365

## What makes CoreSuite different?

We Offer Unparalleled Microsoft 365 Visibility

See all your Microsoft 365 services for your entire tenant through a single console.

We Manage Microsoft 365 Like No Other

Manage Microsoft 365 with permissions and views aligned to your needs.

We Help You Automate Repetitive IT Tasks

Workflow automation dramatically boosts IT efficiency, reducing mistakes.

Gold Microsoft Partner

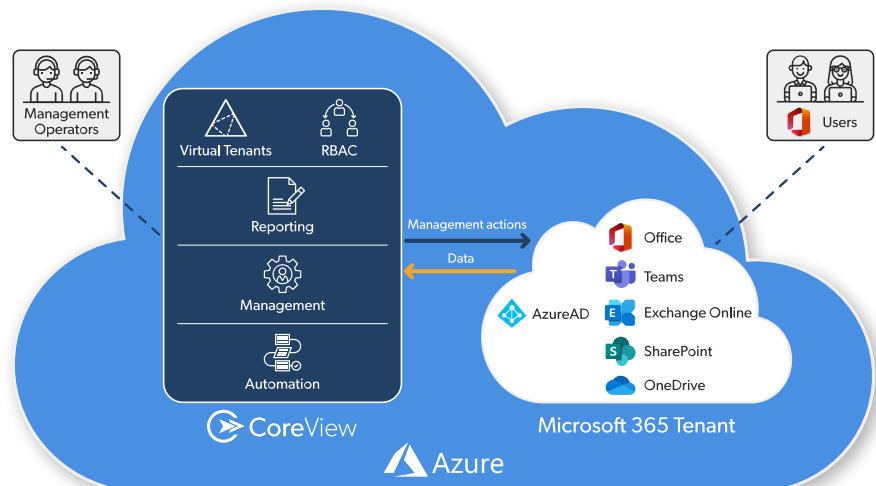

Every R1 Institution, Private, Public and Community College are different – the native Microsoft 365 capabilities aren't enough to support your unique environment, particularly if you have multiple schools, locations and departments operating within a single Microsoft tenant. CoreSuite makes Microsoft 365 management simple – boosting IT efficiency with advanced user management, delegated administration and Virtual Tenants. Maximize your M365 investment with adoption and license lifecycle management and mitigate risk with M365-specific security protections.

## Manage Centralized or De-Centralized IT Models with CoreView Virtual Tenant Technology

Purchasing Microsoft 365 licenses through a single, centralized tenant can result in greater efficiency and cost savings. However, it comes with challenges in administration, meaning Central IT must handle support requests and licensing issues across a variety of departments or agencies. As a result, IT requests get backlogged, and users are frustrated by the response time.

CoreView Virtual Tenants allow you to segment and isolate campus, school, department and/or other groups within a single Microsoft 365 tenant, so you can:

- Allow department-specific IT staff to manage their own division with autonomy while still giving Central IT oversight on billing and chargebacks as well as security and compliance.

- Limit access to necessary information only. For example, should the IT person at the athletic department be able to read the Dean's emails?
- Easily adjust to specific school's needs while maintaining the benefits of a single, global tenant.

CoreView also allows schools and departments to easily set up chargeback systems so that each entity can pay for what it's using, therefore increasing attention to utilization. Finally, our Teams Advanced add-on helps customers control costs associated with VoIP subscriptions associated with Teams Voice.

### Streamline and Automate IT Tasks

CoreView's single administration interface for all of Microsoft 365 helps you streamline IT tasks so you can get more done. Still have some components on-premises? Our Hybrid Connector lets you unify Microsoft administration, rather than managing M365 and on-prem separately.

Workflow automations can speed up tasks like employee onboarding/offboarding, compliance checks, periodic reporting, and more. Workflow tasks complete faster and avoid human errors that can introduce security gaps. CoreView saves our clients thousands of IT hours each year.

### Secure Your M365 Environment

Microsoft is very secure, but only if secured properly. And security concerns are only getting worse with crypto-based ransomware attacks on the rise.

Many attacks target Microsoft in one way or another because it's so ubiquitous. CoreView can quickly detect and remediate security gaps such as:

- Users without MFA enabled
- Email addresses forwarding to external addresses
- Shared mailboxes with too many owners

If an attack, or even a simple mistake, does occur, CoreView can help IT admins track down exactly what happened, when, and who was affected. This allows Colleges and Universities to respond quick and confidently in the event of a problem.

#### FULL VALUE

Get more out of Microsoft 365 by optimizing licenses, driving adoption, and keeping everything under control.

#### FULL OVERSIGHT

Identify and manage security and compliance gaps with visibility into everything from breach attempts to policy violations.

#### FULL SPEED

Turn hours of work into just a few clicks with automation that does the heavy lifting on manual, repetitive tasks.

More than **10 million** users under management

In terms of how to administer Microsoft 365, communicate what is going on, see if there's a problem, manage licenses etc., it couldn't have been done without CoreView. Quite frankly, now we probably wouldn't want to do it without CoreView.

— Tobin M. Cataldo, Executive Director, Jefferson County Library Cooperative

CoreView cuts the chaos and gets Microsoft 365 under control. The CoreView Microsoft 365 Management Platform helps IT teams get full value from their Microsoft 365 investment, gain full oversight of their environment, and move at full speed. More than 10 million users and the world's largest organizations rely on CoreView to craft perfect privileges, eliminate wasted licenses, drive adoption, and automate repetitive tasks. A Microsoft Gold Partner, CoreView is Co-Sell Prioritized and available on the Azure Marketplace. CoreView | Now It's Under Control.
