

Our Mindful Materials Library

Enriching Spaces is dedicated to specifying products, finishes, and materials, that document fiber sourcing, water conservation, carbon reduction, energy sources, air quality, VOC's, recycling, sustainability, and social responsibility. We lead with our Mindful Materials Library and vendor partners who share this commitment.

All of the products, finishes, and materials in our library are stringently curated to meet, at minimum, one of the following certifications:

- ❖ Cradle to Cradle Certification (multi-attribute certification)
- ❖ CDPH (California Dept. of Health, VOC standards)
- ❖ Greenguard Gold (meets CDPH VOC criteria)
- ❖ Intertek Clean Air Gold
- ❖ FACTS Certification for commercial textiles
- ❖ SCS Indoor Advantage Gold (VOC standards)
- ❖ Living Product Challenge (multi-attribute certification program that qualifies products for optimization under WELLv2)
- ❖ Declare Label – a Material Transparency tool based on Living Building Challenge Red List Free and Living Building Challenge Compliant.

We use the ecomedes digital data platform for WELLv2 and LEED documentation.

Enriching Spaces Sustainability Commitment

- ❖ In-house recycling and composting initiatives, reducing land-fill.
- ❖ Jobsite recycling initiatives, reducing land-fill.
- ❖ Repurposing used furniture, donating, and recycling.
- ❖ Consolidating freight practices. Mindful reduction of shipping locations.
- ❖ Implementation of sustainable landscaping practices.
- ❖ Using WELL criteria for selection of cleaning products and pesticides.
- ❖ Maintaining a Mindful Materials Library.
- ❖ Using ecomedes data base for specifying healthy products.
- ❖ Collection and delivering to Cincinnati Hub & ReUse: fabric, carpet, and finish samples, clean styrofoam, bubble wrap, binders, +++
- ❖ Partnering with vendors who prioritize sustainable practices.
