

Safe for Everyone

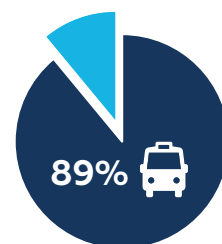

Safety is intimately tied to nearly all aspects of MOMENTUM, including modernizing the investments we've already made to ensure the system is safe and reliable into the future. Residents consistently rated improving safety and reducing crashes as one of their top priorities in improving our transportation system.

Our Plan:

- Invests \$800 million to create better connectivity and improve safety for non-motorized transportation users, including investment in bike lanes and separated/protected paths.
- Invests \$200 million into projects and initiatives that improve safety across the system for all users.
- Implements technology improvements that will reduce vehicular crashes and make our intersections and roadways safer.
- Repairs and replaces aging roadway bridges for safe and efficient travel.

MAG facilitated a values mapping exercise to better understand public values and priorities surrounding transportation in the region.

89 percent of respondents believed investing in transportation should be a regional priority
