

Reducing Error and Increasing Value:

Automated Exit Lane Breach Control (ELBC)

Traditional Security

Unexpected gaps in protection due to sick days and overextended staff resources.

Human error due to shift changes and distractions

Average cost to staff an exit lane is approximately \$150,000/year

Occasional overtime expenses

ELBC

Return on investment possible in as little as 18 months

Alerts personnel, restricts access, and provides detailed information immediately

Minimal cost of ownership

24/7 protection
