

During Quick Start implementations, sites often fall into one of two buckets:

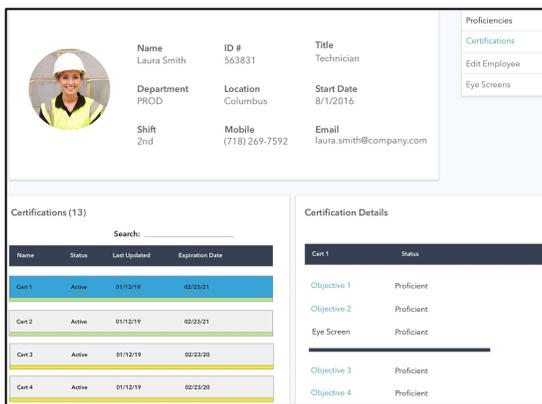

Highly-regulated operations starting inch-wide / mile-deep

Customer goals

- Ensure compliance and traceability on critical operations that have external regulators
 - Ex: ISO, AS9100, FAA 145, DCMA

How do they achieve their goals?

- Digitize existing rigorous qualification & requalification processes
- Structure robust parent/child certification logic

High-priority features

- Auto-generated audit trail
- Robust evaluation builder
- Unique requalification processes
- Expiration-oriented dashboards
- Role-based access control
- Strict version control
- Qualification-based gating (e.g., equipment sign-in, job buy-off, etc.)

How do they measure implementation success?

- Quantifiable reduction of workload (% steps digitized and/or automated)
- Change in compliance %
- New forms of process control

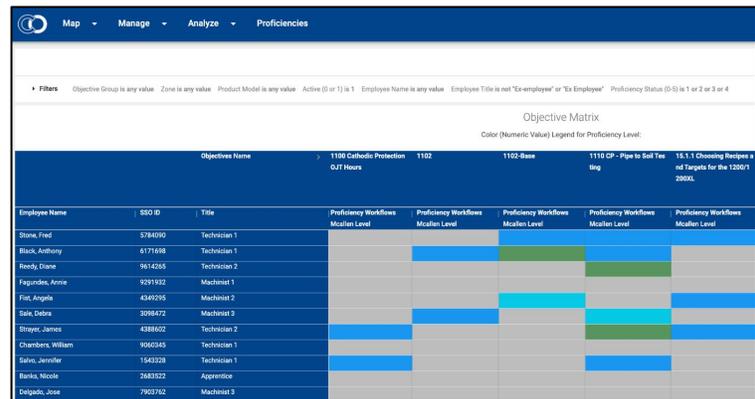

Highly-dynamic operations starting inch-deep / mile-wide

Customer goals

- Provide frontline leaders access to tightly-scoped real-time digital skill matrices
- Accelerate time-to-productivity
- Increase bench strength

How do they achieve their goals?

- Create a single, standardized, objective qualification process that is swift and succinct for efficient data capture

High-priority features

- Auto-generated skills matrix scoped by area & shift
- Attribute tags to categorize qualifications by product, model year, process, line rate, etc.
- Dashboards focused on coverage levels and time-to-productivity

How do they measure implementation success?

- Quantifiable reduction of workload (% steps digitized and/or automated)
- Change in behavior: Frontline leaders accessing matrix to decide who should work where
- Change in time-to-productivity
- Change in bench strength

Get up and running with expert help. Our team ensures targeted implementations to deliver quick wins (weeks, not months).

Easily scale across teams, departments, and sites. Sites can configure unique processes or opt into company-wide standards.

"Service didn't stop after implementation — we work with Covalent's Success Team to address opportunities and create a better user experience for our employees." -- Training Leader, Polaris Industries
