Vendor Type and Products:

Check all vendor types that apply to you, and any goods that apply within the category. If you check more than one vendor type, estimate the percentage of your goods/products that would fall under each category. For example: If you are an artisan craft vendor that would also like to sell jams or jellies, you might estimate that you would have an 80% for “artisan crafts” and 20% for value-added products.

Vendor Type (Check all that apply)	Goods (Check all that apply)	Percentage of Goods (in more than one category)
