

INTRODUCING MI-CASE'S

STAND ALONE SENTENCE CALCULATION MODULE

A fully adaptable module that produces *correct calculations*—every time—for even the most complex sentencing guidelines.

Did we mention it's fully implementable with whatever existing system you have in place today?

We have helped other states implement a sentence calculation module that not only calculates fully documented and sure proof sentence calculations, but is tailored to their exact legislated requirements, with a fully documented set of guidelines.

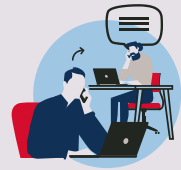

Stop manually calculating offender's sentencing and exposing yourself to risk

Stop relying on time computation staff with undocumented knowledge of time calculations

Get fully documented, sureproof sentence calculations with auditable reports

Engineered and designed by Corrections experts with REAL sentence calculation knowledge and experience

FULLY IMPLEMENTABLE TODAY
TO INTERFACE WITH YOUR EXISTING SYSTEM

Stop leaving your calculations open to mistakes.

The complex nature of legally mandated sentences or new legislation that impacts offender sentences produces an ever-changing, nearly impossible landscape for assuring accurate sentence calculations. Moreover, we understand that constitutional offender liberty issues require the department to accurately report the specific time computation. Though well intentioned, even the best time computations teams and manual processes will struggle to keep up and rarely have the historical calculation data they need when facing legal scrutiny.

HOW OUR CALCULATION ENGINE WORKS:

01 AUDIT YOUR REQUIREMENTS

First, we understand all your laws and regulations, do a full audit and aggregation of calculation requirements, and leave you with a single report that pulls all this vital information into one place.

02 TAILOR & IMPLEMENT

Using an agile methodology, we then take Mi-Case's proprietary sentence calculation module and tailor it to your exact legislative requirements and business requirements. Our engine can be built to interface with your existing systems today, meaning you don't have to wait.

03 RISK FREE & EXTENDABLE

We leave you with an engine that considers all existing legislation, statutes, acts and policy, and is built with extendibility in mind for future updates. With transparent & accountable historical calculation data at the click of a button, your agency can be freed to return to more important work while you rest assured that the history of your correct calculations can be produced at the push of a button.

ALL BACKED BY THE SAME MI-CASE STANDARD:

- ☒ Cloud hosted or on premise
- ☒ CJIS compliant
- ☒ Backed by 24x7 real time staff support
- ☒ Maintained through Evergreen technology
- ☒ **ZERO** Failed Implementations
