

# NICAFOREST JOURNAL

Education is a key pillar to the future of sustainable development.

## PRIMARY & SECONDARY SCHOOL WORKSHOPS

The Covid 19 outbreak has influenced all parts of our society, from the way in which we use resources, to the way in which we interact with one another.

The Nicaforest project has always maintained a policy of prioritizing the safety of our workers & our community, which is why during the onset of the pandemic at the beginning of last year we made the decision to suspend our workshops with the local primary & secondary schools.

Today we are happy to announce that our education initiatives have resumed, and we start off with hosting workshops in four local schools in the surrounding community.

Our team engaged with the Rafael Herrera Institute & Nuestra Senora de Los Angeles schools in the Muhan region, in addition to the Santa Elena & San Antonio de Padua schools located in Chaguitillo.

*Students listen attentively to sustainability presentation (August 23rd, 2021)*

Between the dates of 20-28th of August, members of the Nicaforest team visited & conducted workshops on the topic of environmental education, focusing on knowledge transfer in the field of sustainability, as well as drawing emphasis on vital topics such as climate change, protecting biodiversity, & many more!

Nicaforest is proud of the work we do in fostering the education of young students, and we look forward to furthering our commitment to the development of the future generation of sustainability heroes.

“You never stop learning, and working with bright, young, motivated minds is an excellent learning opportunity to understand what drives the future of sustainable development.”

**Jimmy H. Robles**  
Operational manager at Nicaforest.

# INTERNSHIP PROGRAM FOR UNIVERSITY STUDENTS

We are proud to announce the newest addition to the Nicaforest team, a 4th-year agronomic engineering student at the Agrarian University of Nicaragua named Daker Morales.

*Daker Morales imparting environmental education to primary school students (August 21st, 2021)*

“I joined the Nicaforest project because I wanted to try something new, and as a 4th-year Agronomic Engineering student I viewed this as an opportunity to further my knowledge in the fundamental pillars of economic, environmental, & social development.” - Daker Morales, Nicaforest Intern

Daker is just 23 years old, and while his career in sustainable development is just getting started, Nicaforest is proud to foster the development of the future generation of sustainability heroes.

“It is our social responsibility as a leader in environmental consciousness to not only educate ourselves but to bestow this knowledge on the future generation of environmentalists.”

**Øyvind Berg**  
Nicaforest Founder & CEO
