

**B&B**

## Consulting Enterprises, Inc.

### **Senior Software Developer**

(U.S. Citizen and the ability to obtain the Department of Homeland Security Public Trust clearance required, contact us for more information)

This is a D.C., Maryland, Virginia area position that requires limited on-site work in Northern Virginia.

#### **Company Description:**

B&B Consulting Enterprises (bbcei.com) is a woman-owned business focused on delivering differentiated engineering, IT integration, consulting, and analytic services to DHS, DoD, and commercial clients. Our team includes individuals from large systems integrators, private consulting, and government in engineering, software development, program management, and communications. Our values and people-first approach create growth and opportunities requiring us to expand our permanent team. Under our leadership and structure, B&B provides personal and professional growth and development within a team environment that challenges and rewards to maximize opportunities. None of our positions are dedicated on-site, and we can consider flexible scheduling if we continually meet and exceed customer expectations. We offer a fully paid benefits package, flexible work arrangements across several projects, and competitive compensation.

#### **Position Description:**

We are looking for a senior software engineer to work within a team to find creative, innovative solutions to problems. Create and modify computer solutions and software to satisfy requirements. Run software tests and resolve bugs and inconsistencies. Write code for software patches and bug fixes. Write and continually update documentation for all programs for internal and external references.

#### **Minimum Qualifications**

- Must be a current U.S. citizen and can pass a federal background check to obtain a Department of Homeland Security Entry on Duty clearance (Public Trust).
- A four-year engineering degree or computer science degree with six years of experience or a similar two-year degree with eight years of experience.
- Knowledge of programming languages, especially Java and C#.
- Full-stack development skills, including front-end user experiences and backend database technologies.
- Knowledge of application frameworks, especially Spring Boot and .NET.
- Knowledge of development tools including Eclipse, Visual Studio, and Git.
- Must have excellent creative problem solving and critical thinking skills.
- Interdisciplinary skills that foster rapid system prototyping and experimental solutions.
- Systems integration and systems engineering skills, including interface requirements, testing, and modeling.
- System administration skills for Windows and Linux.

B&B
