

THE DIMENSIONS OF SECURITY CULTURE

OUR PERSPECTIVE

Design IT Deploy IT Prove IT

Behavior

The activities of employees that have direct or indirect impact on the security of the organization.

Cognition

The employees' understanding and awareness of security issues and activities.

Communication

The channels to discuss security-related events and provide support for security issues and incident reporting.

How We Protect You

Information security risks and threats, such as viruses, spyware, ransomware and phishing, are an increasingly significant issue. One in four companies are affected by cyber-crime. DataPath Protect will define your security culture.

Compliance & Responsibility

The knowledge of written security policies and the extent that employees follow them. How employees perceive their role in sustaining or endangering the security of the organization.

Norms

The adherence of unwritten rules of conduct in the organization - how security-related behaviors are perceived by employees as normal.
