

Opti-Lung™

OPTI-LUNG™

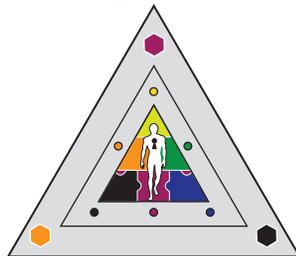

Nutritional support for the Lungs!!

QUICK FACTS

- The lungs are the main organs of the respiratory system, and the main job of the respiratory system is to move fresh air into and get waste gases out of the body.
- The respiratory system brings inhaled air to the proper body temperature, moisturizing the air to the right humidity, and protecting the body from harmful substances by eliminating them through coughing, sneezing, and filtering.

MORE INFO

The lungs are part of a group of organs and tissues—the respiratory system—that all work together to help you breathe. Opti-Lung is a nutritional supplement that provides a high level of beta-carotene and B6 and a combination of herbs and other nutrients thought to work cooperatively in the respiratory system and associated organs.

OPTI - LUNG™

WHY THIS SUPPLEMENT?

Your doctor has placed you in good hands. Optimal Health Systems cares about patients, too, which is why we create supplements that contain nutrients ONLY from whole foods. Because of this, you won't have the same concerns as with synthetics. They are lab-tested and have a wealth of evidence to back our claims, along with patents.

WHAT SETS US APART?

There are plenty of whole food supplements out there, but only Optimal Health Systems takes it a step further with its pre-digestion process we call **Opti-Blend™**. It utilizes a combination of 10 kosher-certified, non-GMO enzymes, and patented organic minerals to pre-digest every nutrient before encapsulating. **Opti-Blend™** ensures delivery at the cellular level and up to a 300% increase in absorption.*

Supplement Facts

Serving Size: 2 Capsules
Servings Per Container: 30

Amount Per Serving		% Daily Value
