Mission and Vision

Whole Health School of Medicine and Health Sciences will support a diverse group of students in acquiring the knowledge, skills, and abilities they need to transform health care, applying a whole-person approach to health and disease while empowering and equipping those they serve to build care around what matters most and live their lives to the fullest at a local, regional, and national level.

VISION

Through the efforts of our faculty, staff and students, and as an institution, we will:

- Deliver an academically rigorous, cutting-edge medical education program to our learners with a whole-person approach to human health and disease. [Science of medicine]
- Discover and apply evidence to promote health and wellness in patients and populations in innovative ways. [Research and Exploration]
- Provide clinical care and treat illness through the lens of Whole Health, incorporating all aspects of health and well-being, including spirituality and mental/emotional health. [Clinical Care, Evolving Whole Health]
- Advance learning in health systems science, including with interprofessional medical education, applying new technologies, and enhancing leadership skills. [Health System Science]
- Provide care that values the importance of the humanities, including the arts, as a means of enhancing health care. [Art of Healing]
- Support the Whole Health of students, faculty, and staff as role models for incorporating Whole Health [Evolving Whole Health]
- Train students to be future leaders, educators, and innovators who can support positive transformation in health care throughout their careers. [Evolving Whole Health, Health Systems Science]
