Tomorrow's Education Raises €3.4 Million in Latest Funding Round

Remote-first challenger university helps learners to build the 21st-century skills needed to create a more sustainable future

BERLIN, February 22nd, 2021: Tomorrow's Education announces a funding round of €3.4 million to fuel the development of future innovators and leaders — enabling people from anywhere in the world to make a sustainable impact while learning the most in-demand skills needed in the 21st-century. The round is led by Mediahuis Ventures, the venture capital firm of the European media group Mediahuis. Other investors include the leading UK Education Fund Emerge Education and angel investors like Verena Pausder, Celine Flores Willers, and Kai Roemmelt.

Tomorrow's Education has partnered with the WU Executive Academy since 2021 whose Executive MBA program is ranked #34 among business schools globally. They jointly offer a Professional Master Degree program in Sustainability, Entrepreneurship, and Technology which is double-accredited in Europe and the US. The University is currently in the process of receiving its own accreditation and plans to offer three distinct Bachelor's Degree programs:

- B.A. in Responsible Entrepreneurship
- B.A. in Sustainable Product Management
- B.Sc in Artificial Intelligence & Sustainable Technologies

The mobile-first application facilitates an effective, globally-accessible, and flexible learning experience based on practical real-world challenges designed with impact-driven industry leaders coming from top companies such as Tier Mobility, Wandelbots, and Share. The challenge-based learning method ensures students gain practical knowledge and real-world experience throughout their studies. The short, bite-sized 7-15 minute lessons are designed for students to learn while simultaneously making an impact in their personal ventures and careers.

Cédric Cops, Investment Lead Mediahuis Ventures states: *“The EdTech market not only offers attractive prospects and opportunities for growth, but it also fits in with Mediahuis’ mission which is to provide independent news and information, thereby making a positive contribution to people and society. For this reason, we support high-growth, cutting-edge startups that are leveraging emerging technologies to re-imagine the way people learn and work. ToU is a very promising player, engaging students in a new kind of metaverse learning experience. We believe in its revolutionary approach to education and see potential for continued growth.”*

¹ToU is currently in the accreditation process and will be accredited in Germany/EU.

Event

There will be a press conference taking place in the Tomorrow University of Applied Sciences¹ metaverse campus on the **23rd of February at 11am CET** with live demonstration, academics, and students. The event is limited to 30 attendees. Signup to reserve your seat:

About Tomorrow's Education

Tomorrow's Education is an EdTech startup founded in 2020 with the mission to accelerate the transition to a sustainable society by educating and empowering the change makers of tomorrow. The seed-stage startup was founded by serial entrepreneur Christian Rebernik and education expert Dr. Thomas Funke with the belief that an entrepreneurial mindset will allow leaders to create the technological solutions needed for a more sustainable future. Tomorrow's Education is the first European startup to found a German accredited University of Applied Sciences. The University provides degree programs that prepare students to drive positive change as they build their competencies.

Tomorrow's Education has made it to the Top 20 of the GSV Cup, presented by Google Cloud, GSV Ventures, HolonIQ, and HubSpot for Startups. The selection was made from a pool of over 750 startups, with the most prestigious and innovative ideas getting the chance to pitch their idea to judges from around the world.
