

# MANAGEMENT RESPONSE

Regional office / cluster: Indonesia/FSC

**Title evaluation report: Mid Term Review Report for Indonesia 2017-2019**

Date of the Management Response: 15 May 2020

Staff involved in the Management Response: C. U. Dewi, Prima Interpares

Cleared by: Chris Claes

<b>Evaluation recommendation / point of attention 1</b>	The exit strategy focuses on ensuring the continuity of community, civil organisation, including their financial securities, are obtained before the end of the programme in 2021.			
<b>Management response</b>	<b>Accepted</b> This strategy has been conducted from the beginning of the FSC program implementation and will be continued/strengthened			
Key action(s)	Time frame	Responsible	Tracking	
			Status	Comments
1.1 Engagement and strengthening of CSOs/CBOs <i>Rikolto will continue to engage and strengthen the capacity of the existing civil society and community based organisations to play a pivot role to take up initiatives at the city level and be a partner of the city government in developing urban food system.</i>	2020-2021	FSC Manager	On going	
1.2 Discussion with the city stakeholders on the key issues of the city food system. <i>These are streamlined with the Rikolto's FSC global strategy. Included in the discussion is capacity gap assessment to inform the capacity building activities to be facilitated by</i>	2020-2021	FSC Manager	To be done	

<i>Rikolto to enable city stakeholders solve the city-key issues. CB activities will take place in 2021.</i>					
<b>Evaluation recommendation / point of attention 2</b>	The program approach has been from the beginning designed to allow a smooth exit strategy. Involving various city stakeholders, public and non-public, and promoting the use of their resources or by generating federal funding, will enable them to drive the movement. The role of Rikolto and partners are connecting them and putting their initiatives in the frame to create a sustainable urban food system. Using topics, which are dear to the policymakers such as food waste in Depok and healthy school canteen in Surakarta, is a useful entry strategy. Further, it is built up to the more central approach of FSC on food policies and procedures that include the food environment.				
<b>Management response</b>	<b>Accepted</b> The current strategies have been and are streamlined to the FSC global strategy

2.1 Facilitation of mutistakeholder exchanges and collaboration of the cities <i>Previously, collaboration and sharing were conducted only between civil society partners of the different cities. Exchanges between city actors (city government officials, community groups and local food industry) will generate sharing of experience, learning from each other and building up a common agenda/ issues/ activities. They are the embryo for FSC community of practice in Indonesia.</i>	2020-2021	FSC Manager	On going		
2.2 Context analysis of the urban food environment. <i>This analysis will inform Rikolto and partners on the strategies to be implemented from 2021 and beyond</i>	2020-2021	FSC Manager + FSC Cluster Coordinator	On going		
<b>Evaluation recommendation / point of attention 3</b>	We are setting-up food council at the city level consisting of multi-stakeholder.				
<b>Management response</b>	<b>Accepted</b> The law mandates the city government to develop food council. The existing institution is food security council consisting of only government agencies. Rikolto and partners' role will be to lobby through the city contact persons.
