Standing Up for Parents

Willie unites parents! He addresses the overdue conversation that “*Parents are the primary stakeholders in their children’s education.*” This is the ultimate reason why we allow teachers to educate our children. Together we can limit the overreach of school boards and all education associations to ensure educational success for our children.

Education Choice & Funding

Parents know what's best for their children. They should have freedom to choose how, where, and what environment will best serve each child. As an investment advisor, Willie has solved budgeting problems for families and businesses for more than 30 years. Money invested to incentivize teachers and create classroom budgets is the point of productivity. Increasing money spent on administration is *not* the answer. Revenue from our lands should fund our children's education, not fill the pockets of the federal government.

Defending Public Lands

Lands within Utah's borders should be controlled and managed in Utah by those who live, work, ranch, and recreate here—not by federal bureaucrats back East.

Fiscal Conservative

A true conservative would never default to increase taxation. Year after year, we see tax increases on gas, food, property, and more. Willie will not support tax increases. He will identify waste, cut spending, and reallocate funds to solve the problems ahead. We do not have an *income* problem in Utah. We have a *budgeting and spending* problem.
