INTRODUCING

Online Scheduling The Way It Should Be.

Make it easier to become your patient, and you'll get more patients.

Scheduling a dental appointment should be as easy asbooking a flight. That's why we built LocalMed Scheduling.

STEP 1

Patient finds your practice online

- They can schedule from anywhere including your website, Google, Facebook, Instagram, Humana, United Concordia, MetLife, Guardian, your recall/reminder emails & texts, and anywhere else you own and control your online presence.
- Booking is open 24/7, even when your office isn't.

STEP 2

Patient easily books an appointment

- Appointment openings are shown in real time. Their contact information is immediately verified.
- Real-time integration prevents double-booking.
- Origination reporting lets you see where they found you.

STEP 3

Appointment is written into your schedule

- Appointment is booked according to your scheduling rules.
- No follow-up call to the patient is necessary.
- No new software for your staff to learn - we work with your practice management system and your existing recall and reminders platform.
