***ATTEND VIA VIDEO CONFERENCE!**
*The Live-Stream Video Conference option for this course is only available to those that live 120 miles or more from the course location. Video conference registrations for this course.

MUST BE PROCESSED BY PHONE

LSUCDE video courses are live streamed via BlueJeans. CE administrators perform roll call and random check-ins via the chat window in BlueJeans. If you miss one or more check ins it could affect your credits. Before the course you will receive three links: a link to the meeting, a link to a short test, and a link to course evaluation. You must submit the test and evaluation in order to receive credit. The Louisiana State Board of Dentistry counts CE hours earned through LSUCDE live video conference as in-person hours.

Course Overview

With over a billion people worldwide, and nearly 30 million in the US breathing badly during sleep, the cost to quality of life and healthcare is unimaginable. Dentists are increasingly taking on some of the functions of primary care doctors as they see people more frequently and apply their long-held preventive focus. The field of sleep and breathing is a part of medicine readily available to the trained dentist.

This course will introduce dentists and their team to: why they should be involved, key information to share with patients and team members, and practical actions every dentist can take right away. If you are curious about sleep and breathing and how it might work for you, or if this part of your practice has waned a bit from previous implementation, this course will give you confidence to immediately provide vital services that will reward your patients, your team, and you with gratitude and business success.

VISA, MasterCard, DISCOVER, and American Express

MORE INFORMATION ON THE BACK!

The virtual participants can join the breathing workshop and watch closely as professional interim devices are created and discussed. The New Orleans learners will have hands-on experience with those devices and some overnight sleep test equipment. Everyone will take away how dentists can use simple devices to assess improvements in breathing with use of various treatment systems.

Learning Objectives

After participating in the activity, attendees will be better able to:

- Recognize and describe signs and symptoms of breathing disorders and their impact on sleep quality
- Describe the health impact of poor breathing and the role of health care providers
- Implement screening tools in their dental clinic
- Present a diagnostic pathway that allows patients to choose the therapy most likely to help them
- Help people breathe better during wakefulness and sleep
- Use simple technology to assess sleep quality before and during therapy
- Provide diagnosed patients with immediate and long-term custom oral devices
- Be comfortable with possible complications of therapy
- Create office workflows to ensure this new service has a positive effect on practice health

ABOUT THE PRESENTERS

Steve Carstensen, DDS, FAGD, Diplomate, AADSM has treated sleep apnea and snoring since 1988. He's the consultant to the ADA for sleep related breathing disorders, and trained at UCLA's Mini-Residency in Sleep. He lectures internationally, advises several sleep-related manufacturers, directs sleep education at the Pankey Institute and is a guest lecturer at Spear Education and LSU School of Dentistry. He is Chief Dental Editor of Dental Sleep Practice Magazine.

Jagdeep Bijwadia, MD, FAASM, FCCP, MBA is a physician entrepreneur board certified in internal medicine, pulmonary and sleep medicine. He served as Attending Physician at HealthPartners Medical Group (HPMG), where he was the Department Head and Director of the Sleep Medicine Center until 2012. He is an Assistant Professor in the Department of Pulmonary Critical Care and Sleep Medicine at the University of Minnesota where he served as Director of the Sleep Program. Dr Bijwadia has been named top doc by the Minneapolis magazine as well as US News and World Report.

LSU Health New Orleans Continuing Dental Education is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.
