Xervices

Our Xentrals generate data through their entire lifecycle, and keeps our developers busy ensuring that Xtellio Cloud and device firmware are secured and up to date. Therefore when you buy our products, we charge you a monthly service fee for each device.

Regardless your choice of subscription, we ensure you a fast and easy onboarding process plus access to the Xtellio Device Manager for easy organizing of your devices.

Easy onboarding and device pairings via QR codes

Xtellio Device Manager

Our subscription tiers and pricing

(Find a detailed scheme at the back)

BASIC

Device cost: 150-200€
Subscription yearly: 36€

Basic tier is for customers wanting to start with a simple solution. Requires only that you set up an endpoint for receiving the data from your devices, or have own Cloud that we can forward it to. We push data to you once a day - how you manage and use this is up to you.
BUSINESS

Device cost: 150-200€
Subscription yearly: 40€

Business tier is for customers looking for added flexibility, configuration options, and the ability to build a solution on our platform. We store and protect data from your devices for up to 1 month, and make sure you always have this data available in the Xtellio Device Manager and our APIs. Business tier also unlocks firmware update over-the-air, and even allows for use of Xenses with your Xentrals.

PREMIUM

Device cost: 150-200€
Subscription yearly: 48€

Premium tier is for customers wanting total freedom and control. We store and protect data from your devices for up to 12 months, and give you full access to our APIs and even streaming options. With the Xtellio Device Manager you may even manage your subaccounts and users, if you for instance are a reseller or partner. Only with this subscription tier do we allow custom firmware settings.
