

RISING SUN

WHITEPAPER

INTRODUCTION

Rising Sun was launched in February 2022, by a team of eight members with various backgrounds to create the ultimate cryptocurrency project. The CEO, David Llewellyn, quit his job seeking to dedicate every second of his day to making Rising Sun a successful project that does not only offer unmatched and never seen-before rewards to its holders, but is also able to give back to the communities around the world that are in much need to see another rising sun by bringing them hope and help by providing needed necessities through donations. By having a strong community and amazing tokenomics, Rising Sun has clearly already become more than just another meme coin in a short period of time. With the hard work of the development team and strength of the community, Rising Sun will rise above all and bring multiple utilities to the space, each fit for everyone's financial needs.

VISION

The Rising Sun project is focused on building generational wealth and providing passive income for our investors through cryptocurrency and leveraging utilities we can bring to our platform creating an ecosystem of wealth. Rising Sun aims to give investors multiple opportunities to invest in our growing ecosystem making it suitable for every kind of investor whether it is short term or long term.

VALUES

The crypto space is always evolving and with it are the dangers of investing in an ever-changing space. Investors have quickly learned that research and due diligence before putting their hard-earned money into a project is paramount. When it comes to investor confidence, Rising Sun ensures to provide the up-most transparency and well-being of our investors. At Rising Sun, we hold regular AMA voice chats where the community is always free to ask anything to be able to be kept up to date on what is going on and where we are going. We are in the process of having a full audit and have locked our liquidity pool for two years.

We strongly believe in being completely straight forward with the community regarding all developments around the project. The Rising Sun team regularly engages and educates the community not only on our projects but investing in general.

1

PHASE

- ☑ WEBSITE LAUNCH V1
- ☑ PRE-SALE AND AIRDROP
- ☑ LIQUIDITY LOCK

TOKENOMICS

5%

ETH REFLECTIONS TO HOLDERS OF \$SUN

3%

AUTO LIQUIDITY POOL

5%

MARKETING AND DEVELOPMENT

The collection has a total of 10,000 NFTs with 358 attributes making each one unique.

The NFT collection is not just a collection of art, but has real life utility. Once minted, you will be able to stake your NFT on our staking platform and redeem rewards in the native token \$SUN and that would lead to more ETH reflections creating a financial ecosystem.

THE FUTURE

There are many things that the Rising Sun team are working on. Including utilities that have never at this time been implemented in the crypto space.

Integrate additional utilities to our NFT program

Partner with top and established crypto groups and tokens Major social media marketing

Secret utility coming

Metaverse integration

Establish a U.S. based Operational office

HOW TO BUY

Please follow our step-by-step instructions below to purchase \$SUN safely

STEP 01 DOWNLOAD METAMASK

From The App Store or Google Play Store, for free. Or add the desktop browser extension on Google Chrome by going to metamask.io

Follow their easy steps from their guide to set up a wallet.

When Metamask asks for your signature go ahead and click sign.

STEP 02 SEND ETH TO METAMASK

You can buy ETH directly through Metamask or you can transfer some from another wallet or crypto exchange.

You can follow tutorials on Youtube if you get stuck on this step.

STEP 03 CONNECT TO UNISWAP

Go to uniswap.org via a desktop browser or inside your Metamask wallet tap the three blue lines at the top left of your screen to reveal your browser.

When Metamask asks for your signature go ahead and click sign.

STEP 04 SWAP YOUR ETH FOR \$SUN

Go to uniswap.org via a desktop browser or inside your Metamask wallet.

Click the cog button and change the “Slippage” amount to 12-15%. Add your desired ETH amount you’d like to swap, once you’re happy click the “Swap” button to finalize the trade.
