

Set, Scoop and Shake

Measuring powder and granulated material has never been simpler than with the adjustable Ezi-action® Powder Measure.

Set the Ezi-action® Powder Measure to the required calibrated graduation mark. Then with the port side away from you, simply scoop the Ezi-action® Powder Measure into the product. Then, with two or three gentle movements shake the excess material away. It will fall out through the unique port side opening.

The Ezi-action® Powder Measure is a proven business tool and can be customised with a coloured inner and labelling.

Technical Data		
Maximum Measuring Capacity	Material	Packaging
Metric 500mls USA 2 1/2 cups	Polypropylene	Each Powder Measure is packaged with instructions in a plastic bag.

Frequently asked questions

How do you set the quantity?

Turn the inner cup so it slopes up to the calibration mark on the right hand side that you wish to measure.

Doesn't all the powder flow out the hole on the side?

The powder flows out the side port and stabilises at the mark on the right hand side. The calibration takes into account the amount that flows out the side port.

Is the Ezi-action® Powder Measure accurate?

The Ezi-action® Powder Measure enables an accurate quantity to be measured not estimated. It has been found that wastage or overuse can be as high as 20-30% where a scoop is used.

What is the Ezi-action® Powder Measure made of?

Made from durable and flexible high grade, Chemical resistant polyethylene but it is not designed to break up lumps of air hardened powder.

What are the safety features?

Shaking the excess powder away from the user reduces powder exposure. Locking on that the set quantity will always be used. It can be reset by simply rinsing with water and drying before use. Colour coding of the inners will differentiate the Powder Measure to a specific chemical powder. White inners are suitable for food applications.

Can the Ezi-action® Powder Measure be customized?

Brand customization with your company / product name, logo, calibration to suit the bulk density of your powder and colour coding of the inner will help customers remain loyal to your brand and differentiate your Powder Measure. Branding makes a statement about the quality of your product and helps command a higher price.

Why offer Ezi-action® Powder Measure with your products?

As a marketing tool it enhances your main line of business. It is ideal as a give away or half price promotional offer for adding value when you launch a product or want to increase market share. It can be promoted as part of a total health and safety package to prevent wastage and overuse.
