Murray

The Build to Last Framework

The Build to Last Framework provides a logical and proven way to move through the stages of the construction process, delivering an excellent experience for our clients on every project.

LISTEN

i. Listen to your vision, goals, and needs

ii. Listen to your priorities, timeline, and budget

iii. Listen for how we can help

STRATEGIZE

i. Define the objective

ii. Analyze the parameters

iii. Identify the team

iv. Develop a strategy

v. Propose an effective service and delivery method with clarity of expectation, general timeline, cost structure, and deliverables

PLAN

i. Define the detailed scope of work and cost

ii. Develop the detailed schedule

iii. Confirm the expectations and deliverables

iv. Agree on the plan for execution

EXECUTE

i. Control quality, schedule, and cost

ii. Communicate, report, and interact professionally

iii. Maintain clean and safe project site

DELIVER

i. Complete within established budget and timeline

ii. Exceed expectations

iii. Follow up proactively to confirm client satisfaction

iv. Deliver excellent construction experience
