

## +70 people

**65%** Software engineers  
**35%** Project Managers, Strategists, Designers & Support Staff.  
**2%** Turnover rate in developers

## About

We love complex technological challenges.

We do things, we take risks, and we push forward. We have released and closed many projects but that has allowed us to improve, contribute, and embark on the next one.

We have accompanied start-ups until they became unicorns and then went public, companies in the top positions of the fortune 100 and leading educational institutions through their innovation and research projects.

We are 100% financially independent. We have a strong culture around care, effort, wellness and sustainability.

We enjoy and have a lot of fun.

## Stack

These are some of the technologies we work with:

**Java · Spring · React · Kotlin · Swift · Kafka · Booster · Typescript · Kubernetes · Python · GraphQL · Solidity**

## Languages

**English** is our official language.  
**Spanish** is our native language.  
**+14** languages we collectively speak.

## Interests

**We develop specific projects in areas we are interested in:**

- technology, creativity, and complexity.
- sustainability and having a positive impact on society and the environment.
- taking care of ourselves: eating well, sleeping well, and exercising.
- equality and diversity.

## Remote company and distributed team

Our team is distributed around the world: Spain, United Kingdom, Canada, United States, Chile, Brazil, Portugal and the list keeps growing. **We work remotely and asynchronously from day one.**

## Experience

### 2022 GROWTH

Positioned as leading experts in microservices and event-driven architectures, we are also developing projects in the area of Web3, data and security working for some of the best companies in the world.

**Present clients:** Harvard, Horizen labs, Rent the Runway, among others...

**Projects:** Booster Framework, MayDay Messaging mobile app, Grapes.

### 2019 CULTURE & INNOVATION

The pandemic impact was an opportunity for us to strengthen our culture and enhance our innovation.

Our financial stability allowed us not to have to lay off anyone in the team, even though many of our customers stopped their activity. During this transition, we invested heavily in our research and innovation projects by launching products such as the open-source framework Booster or the MayDay Messaging mobile app.

### 2016 EXPANSION

Our innovation in mobile eCommerce caught eBay's attention, and they ended up becoming our first US client.

The collaboration was a success and triggered a series of recommendations that allowed us to work with companies such as Paypal, Rent the Runway, Zara, Merrill Corporation (Datasite) and prepared the ground for what we are today.

### 2013- 2016 ORIGINS

We began as a bootstrapped company, like many others. We started with clear ideas: to work on innovative projects that solve complex problems and avoid investment or loans.

We began working for small startups and eCommerce companies, and then Aristocracy came along and pushed us to specialize in mobile eCommerce.

## Products & projects by The Agile Monkeys

A selection of projects we have done in the last few years

### **Booster framework**

Open-source solution for building serverless, scalable, and reliable event-driven applications. ↗

### **Plasmido**

An application to produce and consume events from one or several Kafka brokers at the same time.

### **Haskell Do**

An open-source Haskell code editor focused on interactive development. ↗

### **MayDay Messaging App**

An exclusive communication channel, a direct line for really important messages that require immediate attention/response. ↗

### **English4Devs**

An English and communication skills acceleration program specialized in developers. ↗

### **Counteract**

A platform to bring content creators and sustainable brands together and empower them. ↗

### **Pickbit**

The Giphy of audio formats. ↗

### **Rockets Platform**

A community-driven catalog of building blocks for your software applications. ↗

### **Sophy**

A sustainable yoga retail company and circular economy. ↗
