

Your journey starts here

Your journey starts here

Our employees collectively have over 250 years of experience in transportation and logistics.

LoadMaster offers distribution of goods both domestically and internationally through a well-developed network.

We can also assist with customs clearance and direct transport, distribution via terminal, or storage of goods. Our freight forwarders are flexible and solution-oriented when it comes to execution.

LoadMaster is known for its intelligent solutions in express logistics and its ability to handle assignments that go beyond the usual parameters.

Master

International

LoadMaster specializes in tailored solutions for multiple countries, ensuring that you can trust us to consistently find the most efficient and cost-effective transport solution for you and your goods.

Domestic

LoadMaster offers nation-wide distribution through partnerships with local expertise and terminals throughout Norway, with daily departures to and from the major cities.

Part Loads

Part Loads or FTL is larger shipments where we primarily pick up and deliver directly. This is suitable for larger quantities, large and irregular cargo, and requires easy access for a large truck at the pickup and delivery points.

We deliver Part Loads through our extensive network in Norway as well as to and from the Nordic countries and the rest of Europe.

Groupage

Groupage are smaller shipments suitable for regular distribution vehicles with a weight not exceeding 2.5 tons and a maximum length of 2.4 meters.

We provide groupage throughout Norway with daily departures to the major cities.

Project

If you have transport that requires special vehicles or extra attention, or if you need advice and guidance to find a suitable solution, we have a project department that can assist with consulting and planning.

As our customer, you can expect to be supported through every step of the journey.

Crane delivery

When the cargo cannot be delivered at the door or is not suitable for regular transportation, we have equipment to handle most crane-related tasks.

We dispatch the cargo with a crane truck directly from our terminal or combine it with line-haul to a terminal near the delivery location, conducting crane truck operations only when essential.

We have extensive experience in finding effective and cost-efficient solutions for crane delivery.

Home delivery

LoadMaster offers home delivery services throughout Norway, and we excel in delivering furniture and goods that require extra care. We place a strong emphasis on effective communication with the recipient during deliveries, ensuring that the customer experience, from the moment of ordering from your store to the delivery, is as smooth as possible.

Our standard service includes delivery to the curb, but in and around the largest cities, we also offer indoor delivery, assembly, and returns.

Warehouse services

LoadMaster offers short- and long-term storage with a central location in Lillestrøm.

We have large outdoor areas for storing irregular cargo, as well as indoor storage for standard pallet goods and pick items.

3PL

Through our 3PL (third-party logistics) solution, we manage your inventory from purchase order is received for your suppliers until delivery is made to your customers. Our warehouse employees make an inspection upon receipt, sort and label the items before the goods are placed in the warehouse. We continuously pick and pack orders for your customers.

Our WMS system (Ongoing) provides you with comprehensive inventory visibility and offers robust options for extracting statistics on the movement of goods.

Transshipment services

At our terminal, we offer transshipment of goods through both loading ramps and with forklifts.

If you have goods that you've booked for onward transport with an external carrier. If you need to rearrange goods on a vehicle to make room for new loading. Then we can assist you.

Short term storage

At our terminal, we always have space available for short-term storage of larger or smaller batches of goods. We offer storage outside or inside depending on need.

If you need help with reloading the goods, we also have a wide range of reloading services.

At LoadMaster, we have a combined experience of over 250 years in transport and logistics. Our team consists of employees with extensive and diverse experience, specializing in unusual cargo. We love a challenge! Feel free to contact us for a non-binding conversation
