

CASPER

CIVILIAN ACCESS STAIR PLATFORM EXTENSION RIG

The Civilian Access Stair Platform Extension Rig (CASPER) is a military-grade all-steel platform with an integrated retractable staircase designed to greatly improve the safety and speed of loading and unloading civilians (or civilian firefighters) into and out of National Guard MTV/LMTV cargo trucks while deployed on domestic response activations such as flood rescue, wildland fire support, law enforcement/security details, etc. CASPER “drops” onto and can be removed from the bed of any A0, A1, A1R, A1P2 or A2 cargo model FMTV in less than four minutes with minimal training and no modifications required to the vehicle.

KEY SPECIFICATIONS

- Gives Our Warfighters the Right Tools For the Right Job for Civilian Deployments
- Lowers the Entry Level Bed Height from 63-inches to 14-inches
- Significantly Improves Safety and Speed of Ingress/Egress for Civilians, Firefighters and Troops

- Powered from Standard Vehicle Trailer Connector
- Hot-Dipped Galvanized Steel Construction - Will Provide Decades of Service Without Corrosion
- Stows Outdoors in 4-Foot x 8-Foot Space, All Electrical Components are Protected

Acela Truck Company is a USA-based Family of Medium Tactical Vehicle (FMTV) resetting specialist. Acela is the largest producer of flood rescue trucks in the world. Acela is also the largest company that resets FMTV's, for civilian use primarily in the mining, oil & gas, pipeline and firefighting/flood rescue industries. This experience has enabled Acela to develop many enhancements for and engineered improvements to the FMTV to enhance performance, increase durability, improve safety, etc. One such improvement is a series of add-on platforms for FMTV cargo variants that we call CASPER.
