<b>Business Description:</b>	<p>Advanced Blockchain AG is an exchange-traded blockchain venture studio focused on promoting, building and investing in disruptive technologies including token investments. Its main markets are therefore the venture capital market for companies active in blockchain technology, with a particular focus on the decentralized finance sector and infrastructure projects enabling Web 3.0. The business model rests on three pillars:</p> <p><b>1] Smart Capital Investments:</b> The strategic capital allocation and portfolio support efforts: AB.Capital is the investment wing and is uniquely positioned to provide smart capital to entrepreneurs at every stage of the business lifecycle. Advanced Blockchain's portfolio companies can take full advantage of the resources provided by AB Labs and AB Research to accelerate their growth, refine their innovations, and scale their operations. In this way, the company gives their shareholders the opportunity to participate early in attractive and exclusive Web3 opportunities, providing long-term value to global investors, partners, and communities.</p> <p><b>2] Proactive Venture Building and Incubation:</b> The integrated approach to venture building and scaling: AB.Labs is a hub for like-minded founders seeking to incubate their ideas through Advanced Blockchain's venture-building division. The company gives entrepreneurs the resources they need to build and scale their ideas, whilst identifying further opportunities to integrate their</p>

	<p>developments with other products and services within Advanced Blockchain's holistic ecosystem. As a result, the lab and research teams work in tandem to develop valuable and necessary solutions, equipped with the talent, resources, and tools needed to scale the business efficiently and successfully.</p> <p><b><u>3) Holistic Research and Education:</u></b> The holistic research efforts and educational programs:</p> <p>AB Research is an integral part of enabling the future of Web3 by analyzing, theorizing, and actualizing solutions to the most probing questions in the industry. Advanced Blockchains research division acts as an in-house think tank to identify problems in the industry and create innovative solutions. Additionally, it supports the portfolio companies by understanding and deploying their expertise to solve some of their most in-depth problems.</p>
