Soil Type of Vineyard: Sandy

Fermentation Method: Stainless steel

Aging Method: Not barrel aged

2019 was a quieter year with no major concerns, no diseases or pests to record. An excellent year for viticulture here on the Setubal Peninsula. The grapes matured in their time and the harvest took place without major setbacks. Good quality grapes make excellent quality wines. In 2019, production increased by about 10% compared to 2018.
